

Treat Your Water - Stay Healthy

SIMPLE HOME WATER TREATMENT

Water from water pans and rivers can have germs that cause diseases and even death to people. Remove germs by treating your water at home. This means having good and safe drinking water.

CLEAN WATER:

- * is free from germs
- * Tastes good
- * Is good and healthy to drink
- * Is clear

WHAT ARE THE COMMON DISEASES FROM BAD WATER?

WHY SHOULD YOU TREAT YOUR WATER?

- * To kill germs
- * To remove dirt
